Horizontal puzzle grid template guide

Thank you for purchasing the horizontal grid template to use in Canva. All the instructions you need are below to create 15 *stand out* Instagram posts ready to go very quickly.
If you have any questions please email me:
fayemorgan@365daysocial.com

365 DAY SOCIAL

1

Click on **this link** to access your template.
Or paste the following into your browser:
https://www.canva.com/design/DADRbRHpmLM/share?role=EDI-TOR&token=xh8kufw3GAUi5M3C85LT_Q&utm_content=DADRbRHpmLM&utm_campaign=designshare&utm_medium=link&utm_source=sharebutton

PLEASE make sure that the first thing you do is **make a copy.**
If you don't, you'll render the template unusable for others.

2

Delete both the white writing and the red overlay on the horizontal grid, which reminds you to **make a copy.**
Simply click to *highlight* and press *delete.*

Here's your grid now ready to customise to make it your own.

PLEASE MAKE A COPY OF THIS FIRST AND USE THAT COPY TO MAKE THE CHANGES YOU NEED.

YOU CAN THEN DELETE THIS TEXT AND THE RED BOX ON YOUR COPY. MANY THANKS!

3

The flower images I use are from Canva but I **strongly** advise you change these to your own.
To alter the photos either search for new ones in Canva or - and this is what I'd recommend to make it more unique - upload your own.

Once uploaded, drag your photo across to the grid and hover over the photo you'd like it to replace. It will 'snap' into place.

4

Change the background colours to reflect **your brand**, the seasons or to pick out the colours within your photos.
Highlight the colour blocks you wish to change then select the small square above and to the left of the grid. Here you can add your palette of colours. Press '+' to add colours using the colour wheel or Hex codes.

Once finished you are ready to download.
Click *download* and select *PNG* and then *download.*

5

Transfer to your phone via email, airdrop or however you prefer. Then use an app such as Photo Grid to quickly split the grid into 15 squares. PhotoGrid is free to use. This is the one…

Photo Grid - Create Grids Pics

6

In PhotoGrid:
Select:
-photogallery
-choose the grid you just downloaded from Canva
-click on the 15 square photogrid, click next
-close the pop-up ads!
-choose normal
-press the tick (top right)
-save to camera roll

7

I would advise uploading to Planoly or Later or Plann so that you can make sure your grid posts are in the correct order.

That is it!

15 posts to use with just captions to add. Enjoy! And do get in touch via email or social media. All my details are below.
